Melt Pressure Controllers

GEFRAN 2500

MELT PRESSURE CONTROLLER

- Designed to control melt pressure by controlling main drive speed
- Models compatible with transducers
- Configurable alarm relay outputs
- 0-10 Vdc, 0-20mA or 4-20mA control output
- Display shows actual pressure, pressure set point and output %
- Manual mode with bumpless changeover to auto for easy start-ups
- Optional retransmission output

**No Charge
Configuration
Just wire up and run!**

Differential Pressure Controller

- Display P1, P2 and differential pressure on front display
- Two transducer inputs
- Alarm relay to index screen changer
- Control extruder pressure and signal screen changer change from same unit

Melt Pressure Control Package

Package Includes:

- *Gefran Melt Pressure Controller 2500*
- *CA-25 Cable*
- *Your Choice of 0100 or 0101 Series Transducer*

Just \$1575⁰⁰
